| Foreword | iii |
| Introduction to the Sixth Edition | v |
| Purpose and Scope | vii |
| Glossary | xxv |
| Abbreviations | xxxvii |
| Bibliography | xlii |

PART 1 General Information 1

| | | |
|------------------|--|-----------|
| Chapter 1 | Basic Properties and Hazards of Petroleum | 3 |
| 1.1 | Vapour pressure | 3 |
| | True Vapour Pressure | 3 |
| | Reid Vapour Pressure | 4 |
| 1.2 | Flammability | 4 |
| | General | 4 |
| | Flammable limits | 4 |
| | The effect of Inert Gas on flammability | 5 |
| | Tests for flammability | 6 |
| | Flashpoint | 6 |
| | Flammability classification of petroleum | 7 |
| 1.3 | Density of hydrocarbon gases | 7 |
| 1.4 | Toxicity | 8 |
| | Introduction | 8 |
| | Liquid petroleum | 8 |
| | Petroleum gases | 8 |
| | Safety Data Sheets | 10 |
| | Benzene and other aromatic hydrocarbons | 10 |
| | Hydrogen sulphide | 11 |
| | Mercaptans | 16 |
| | Cargo and bunker residues | 16 |
| | Gasolines containing tetraethyl lead or tetramethyl lead | 17 |
| | Biofuels | 17 |
| | Inert Gas | 17 |
| | Oxygen deficiency | 18 |
| 1.5 | Pyrophoric iron sulphide | 18 |
| | Pyrophoric oxidation | 18 |
| | Formation of pyrophors | 18 |
| | Preventing pyrophoric ignition in inerted cargo tanks | 19 |
| 1.6 | The hazards associated with handling, storing and carrying residual fuel oils | 19 |
| | The nature of the hazard | 19 |
| | Flashpoint and headspace flammability measurement | 20 |
| | Precautionary measures | 20 |
| | Hydrogen sulphide hazard in residual fuel oils | 21 |

| | | |
|------------------|--|-----------|
| Chapter 2 | Gas Evolution and Measurement | 23 |
| 2.1 | Hydrocarbon gas evolution and dispersion | 23 |
| | Introduction | 23 |
| | Gas evolution and venting | 24 |
| | Gas dispersion | 26 |
| | Minimising hazards from vented gas | 31 |
| 2.2 | Loading very high vapour pressure cargoes | 33 |
| | Gas evolution | 33 |
| | Special precautions with very high vapour pressure cargoes | 34 |
| 2.3 | Volatile Organic Compounds | 35 |
| 2.4 | Gas measurement | 35 |
| | Provision of gas measurement instruments | 35 |
| | Gas measurement instruments | 36 |
| | Instruments for measuring hydrocarbon concentration | 37 |
| | Instruments for measuring oxygen concentrations | 37 |
| | Instruments for measuring toxic gases | 37 |
| | Technologies used to measure flammable atmospheres, toxic vapours and oxygen | 38 |
| | Testing and calibrating gas measurement instruments | 49 |
| | Gas measurement instrument alarms | 50 |
| 2.5 | Sampling | 51 |
| | Gas sample lines | 51 |
| | Filters in sample lines | 51 |
| | Gas sample procedures | 51 |
| 2.6 | Fixed hydrocarbon gas detection systems | 52 |
| | Fixed hydrocarbon gas detection systems on tankers | 52 |
| | Fixed hydrocarbon gas detection systems in terminals | 53 |
| Chapter 3 | Static Electricity | 57 |
| 3.1 | Principles of electrostatics | 58 |
| | Summary | 58 |
| | Charge separation | 58 |
| | Charge accumulation | 59 |
| | Electrostatic discharge | 60 |
| | Electrostatic properties of gases and mists | 64 |
| 3.2 | General precautions against electrostatic hazards | 65 |
| | Overview | 65 |
| | Bonding | 66 |
| | Avoiding loose conductive objects | 66 |
| | Filters | 67 |
| | Fixed equipment in tanks | 67 |
| | Free fall in tanks | 67 |
| | Water mists | 67 |
| | Inert Gas | 69 |
| 3.3 | Other possible sources of electrostatic hazards | 69 |
| | Discharge of carbon dioxide | 69 |
| | Clothing and footwear | 69 |
| | Synthetic materials | 69 |

| | | |
|------------------|---|-----------|
| Chapter 4 | Managing Hazards and Risks for Ship and Terminal | 71 |
| 4.1 | Management system | 71 |
| 4.2 | Risk management | 72 |
| | General | 72 |
| | Risk assessment | 72 |
| | Hierarchy of controls | 73 |
| | Marine interface risks | 73 |
| | Management of Change | 74 |
| 4.3 | Stop Work Authority | 74 |
| 4.4 | Lock-out/Tag-out | 74 |
| 4.5 | Control of hazardous energy | 75 |
| | Hazardous energy | 75 |
| | Hazardous energy controls | 75 |
| 4.6 | Simultaneous Operations | 77 |
| | General | 77 |
| | Managing Simultaneous Operations | 77 |
| | Decision matrix | 79 |
| | Matrix of permitted operations | 79 |
| 4.7 | Permit to work systems | 80 |
| | General | 80 |
| | Permit to work systems – structure | 80 |
| | Permit to work systems – principles of operation | 81 |
| | Permit to work forms | 81 |
| | Work planning meetings | 82 |
| | Toolbox talks | 82 |
| 4.8 | Personal safety | 82 |
| | Personal Protective Equipment | 82 |
| | Slip, trip and fall hazards | 83 |
| | Asbestos | 83 |
| | Personal hygiene | 83 |
| 4.9 | Preventing fire and explosion | 84 |
| 4.10 | Control of potential ignition sources | 84 |
| | Naked lights | 84 |
| | Smoking | 84 |
| | Smoking at sea | 84 |
| | Smoking in port and controlled smoking | 84 |
| | Location of designated smoking places | 85 |
| | Matches and cigarette lighters | 85 |
| | Electronic or e-cigarettes | 85 |
| | Notices | 86 |
| | Galley stoves and cooking appliances | 86 |
| | Funnel emissions | 86 |
| | Spontaneous combustion | 86 |
| | Auto-ignition | 87 |
| | Equipment made of aluminium | 87 |
| | Cathodic protection anodes in cargo tanks | 87 |

| | | |
|------------------|--|------------|
| 4.11 | Electrical equipment and installations in hazardous areas | 87 |
| | General | 87 |
| | Hazardous areas | 87 |
| | Hazardous areas on a tanker | 88 |
| | Hazardous areas at a terminal | 88 |
| | Sources of ignition from electrical equipment | 88 |
| | Standards of electrical equipment for use in hazardous areas | 88 |
| | Inspection, maintenance and testing of electrical equipment | 89 |
| | Changes to electrical equipment and systems | 90 |
| | Electrical repairs, maintenance and testing at terminals | 90 |
| 4.12 | Portable electrical and electronic equipment | 91 |
| | General | 91 |
| | Electrical equipment on flexible cables | 92 |
| | Air-driven lamps | 92 |
| | Torches, lamps and portable battery powered equipment | 93 |
| | Mobile telephones and pagers | 93 |
| | Cameras | 93 |
| | Other portable electrical equipment | 93 |
| | Lithium batteries | 94 |
| 4.13 | Communications equipment | 94 |
| | General | 94 |
| | Ship's radio equipment | 95 |
| | Tanker radar equipment | 95 |
| | Automatic Identification Systems | 96 |
| | Landline telephones | 96 |
| 4.14 | Tools | 96 |
| | General | 96 |
| | Hand tools | 96 |
| | Electrical tools | 97 |
| | Mechanically powered tools and grit blasting | 97 |
| | Hydroblasting (high pressure water washing) | 97 |
| Chapter 5 | Fire Protection | 99 |
| 5.1 | Theory of firefighting | 99 |
| 5.2 | Types of fire and appropriate extinguishing agents | 99 |
| 5.3 | Extinguishing agents | 99 |
| | Cooling agents | 102 |
| | Smothering agents | 103 |
| | Flame inhibiting agents | 105 |
| | Clean agent fire suppression systems | 106 |
| | Inert Gas system | 106 |
| 5.4 | Portable fire extinguishers | 106 |
| 5.5 | International shore fire connection | 108 |
| 5.6 | Water borne firefighting equipment | 108 |
| 5.7 | Protective clothing | 109 |

Contents

| | | |
|----------------------------------|---|------------|
| 5.8 | Automatic fire detection systems | 110 |
| | General | 110 |
| | Types of fire detectors | 110 |
| | Selection of fire detectors | 110 |
| | Fire detection and alarm systems in terminals | 111 |
| Chapter 6 | Security | 113 |
| 6.1 | General | 113 |
| 6.2 | Threat and risk assessment | 113 |
| 6.3 | Security risk assessments | 114 |
| 6.4 | Cyber safety and security | 114 |
| 6.5 | Security plans | 115 |
| 6.6 | Responsibilities under the International Ship and Port Facility Security Code | 115 |
| Chapter 7 | Human Factors | 117 |
| 7.1 | General | 117 |
| 7.2 | Identification and analysis of Safety Critical Tasks | 118 |
| 7.3 | Design | 119 |
| 7.4 | Risk assessment | 120 |
| 7.5 | Procedures | 120 |
| 7.6 | Leadership | 121 |
| 7.7 | Confidence to stop work or speak up | 121 |
| 7.8 | Fatigue | 122 |
| 7.9 | Manning levels | 123 |
| 7.10 | Individual training, experience and competence | 123 |
| 7.11 | Practising team skills | 124 |
| 7.12 | Human factors in investigation and learning | 124 |
| Chapter 8 | Alternative and Emerging Technologies | 125 |
| 8.1 | Definition | 125 |
| 8.2 | Examples | 125 |
| 8.3 | Due diligence process | 126 |
| | Evaluation | 126 |
| | Impact | 126 |
| | Equivalency | 126 |
| | Formal safety risk assessments | 127 |
| | Stakeholder engagement | 127 |
| PART 2 Tanker Information | | 129 |
| Chapter 9 | Management of Safety and Emergencies | 131 |
| 9.1 | The International Safety Management (ISM) Code | 132 |
| 9.2 | Safety Management Systems | 132 |
| 9.3 | Work planning and permit to work systems | 133 |

| | | |
|-------------------|--|------------|
| 9.4 | Hot work | 133 |
| | Definition of hot work | 133 |
| | Control of hot work | 133 |
| | Hot work inside a designated space | 133 |
| | Hot work outside a designated space | 134 |
| | Hot work in dangerous or hazardous areas | 136 |
| 9.5 | Electric welding equipment | 146 |
| 9.6 | Other hazardous tasks | 146 |
| 9.7 | Management of contractors | 146 |
| 9.8 | Managing Simultaneous Operations | 147 |
| 9.9 | Hazards on ships with exposed transverse frames | 147 |
| | Manifold platform | 147 |
| | Sampling and measurement points | 148 |
| 9.10 | Repairs at a facility other than a shipyard | 148 |
| | Introduction | 148 |
| | General | 148 |
| | Supervision and control | 148 |
| | Pre-arrival planning | 149 |
| | Mooring arrangements | 149 |
| | Shore facilities | 149 |
| | Work planning meetings | 150 |
| | Permits to work | 150 |
| | Tank condition | 151 |
| | Cargo lines | 151 |
| | Firefighting precautions | 151 |
| | Safety Officer | 151 |
| | Hot work | 151 |
| 9.11 | Shipboard emergency management | 152 |
| | General | 152 |
| | Tanker emergency plan | 152 |
| | Action in an emergency | 154 |
| Chapter 10 | Enclosed Spaces | 157 |
| 10.1 | Introduction to enclosed space entry safety | 157 |
| 10.2 | Safety management for entering enclosed spaces | 158 |
| | General | 158 |
| | Managing controlled entry into enclosed spaces | 159 |
| | Managing enclosed spaces not planned for entry | 163 |
| 10.3 | Identifying enclosed spaces | 164 |
| 10.4 | The hazards of enclosed space atmospheres | 165 |
| | Oxygen deficiency | 165 |
| | Presence of toxic and/or flammable gases | 166 |
| | Risk from Inert Gas including nitrogen | 166 |
| | Oxygen enrichment | 167 |
| 10.5 | General precautions | 167 |

Contents

| | | |
|-------------------|--|------------|
| 10.6 | Authorisation of entry | 168 |
| 10.7 | Requirements for enclosed space entry | 168 |
| | Control of entry into enclosed spaces | 168 |
| | Atmosphere tests before entry | 168 |
| | Enclosed space entry permit | 169 |
| 10.8 | Precautions during entry into enclosed spaces | 171 |
| 10.9 | Work in enclosed spaces | 172 |
| | General requirements | 172 |
| | Opening equipment and fittings | 172 |
| | Use of tools | 172 |
| | Use of electric lights and electrical equipment | 172 |
| | Removal of sludge, scale and sediment | 172 |
| | Use of work boats | 172 |
| 10.10 | Entering enclosed spaces with atmospheres known or suspected to be unsafe | 173 |
| 10.11 | Rescue and evacuation from enclosed spaces | 174 |
| | Evacuation from enclosed spaces | 174 |
| | Organising rescue and recovery from enclosed spaces | 174 |
| 10.12 | Cargo pumproom entry precautions | 176 |
| | Cargo pumproom entry procedures | 176 |
| | Cargo pumproom ventilation | 177 |
| 10.13 | Respiratory Protective Equipment | 177 |
| | Self-Contained Breathing Apparatus | 177 |
| | Air-line breathing apparatus | 178 |
| | Emergency Escape Breathing Device | 178 |
| | Equipment maintenance | 179 |
| | Stowage | 179 |
| | Breathing apparatus training | 179 |
| Chapter 11 | Shipboard Systems | 181 |
| 11.1 | Fixed Inert Gas systems | 181 |
| | General | 181 |
| | Sources of Inert Gas | 182 |
| | Composition and quality of Inert Gas | 182 |
| | Methods of replacing tank atmospheres | 182 |
| | Cargo tank atmosphere control | 183 |
| | Use during cargo tank operations | 184 |
| | Precautions to be taken to avoid health hazards | 187 |
| | Cargo tank protection against over/under pressure | 188 |
| | Product carriers fitted with an Inert Gas system | 189 |
| | Cold weather precautions for Inert Gas systems | 189 |
| | Inert Gas system failure | 190 |
| | Emergency Inert Gas supply | 191 |
| | Inert Gas plant repairs | 191 |
| 11.2 | Venting systems | 191 |
| | General | 191 |
| | Tank over pressurisation or under pressurisation | 191 |

| | | |
|-------------------|--|------------|
| 11.3 | Cargo and ballast systems | 193 |
| | Operation manual | 193 |
| | Cargo and ballast system integrity | 193 |
| | Loading rates | 194 |
| | Monitoring of void and ballast spaces | 195 |
| 11.4 | Power and propulsion systems | 195 |
| 11.5 | Vapour recovery systems | 196 |
| 11.6 | Volatile Organic Compound recovery systems | 196 |
| 11.7 | Stern loading and discharging arrangements | 197 |
| Chapter 12 | Shipboard Operations | 199 |
| 12.1 | Cargo operations | 199 |
| | General | 199 |
| | Setting of lines and valves | 200 |
| | Valve operation | 200 |
| | Pressure surges | 200 |
| | Butterfly and Non-Return (check) Valves | 200 |
| | Loading procedures | 201 |
| | Loading static accumulator oils | 207 |
| | Loading very high vapour pressure cargoes | 213 |
| | Loading cargoes containing hydrogen sulphide | 214 |
| | Benzene and mercury | 215 |
| | Loading heated products/cold oil cargoes | 215 |
| | Loading over the top (or loading overall) | 216 |
| | Discharging procedures | 216 |
| | Pipeline and hose clearing after cargo operations | 219 |
| | Pumproom operational precautions | 221 |
| 12.2 | Stability, stress, trim and sloshing considerations | 224 |
| | General | 224 |
| | Free surface effects | 224 |
| | Heavy weather ballast | 224 |
| | Loading and discharge planning | 225 |
| | Intact and damage stability | 225 |
| 12.3 | Tank cleaning | 225 |
| | General | 225 |
| | Tank washing risk management | 225 |
| | Supervision and preparation | 225 |
| | Tank atmospheres | 226 |
| | Tank washing | 226 |
| | Precautions for tank washing | 229 |
| | Wash water analysis | 231 |
| 12.4 | Gas freeing | 232 |
| | General | 232 |
| | Gas free for entry | 232 |
| | Procedures and precautions | 233 |
| | Gas testing and measurement | 234 |

Contents

| | |
|--|------------|
| Fixed gas freeing equipment | 234 |
| Portable fans | 234 |
| Ventilating double hull ballast tanks | 235 |
| Gas freeing in preparation for hot work | 235 |
| 12.5 Crude Oil Washing | 235 |
| General | 235 |
| Advance notice | 235 |
| Tank washing machines | 236 |
| Control of tank atmosphere | 236 |
| Precautions against leaks from the washing system | 236 |
| Avoiding oil and water mixtures | 236 |
| Isolating the tank cleaning heater | 236 |
| Supervision | 236 |
| 12.6 Ballast operations | 236 |
| General | 236 |
| Loading cargo tank ballast | 237 |
| Loading segregated ballast | 237 |
| Discharging segregated ballast | 238 |
| Ballast water exchange at sea | 238 |
| 12.7 Cargo leaks into double hull tanks | 238 |
| Action to be taken | 238 |
| Inerting double hull tanks | 239 |
| 12.8 Cargo measurement, ullaging, dipping and sampling | 240 |
| General | 240 |
| Measuring and sampling non-inerted tanks | 242 |
| Measuring and sampling inerted tanks | 245 |
| Measuring and sampling cargoes containing toxic substances | 247 |
| Closed gauging for custody transfer | 248 |
| Cargo tank monitoring systems | 248 |
| 12.9 Transfers between ships | 248 |
| Ship to Ship transfers | 248 |
| Ship to barge and barge to ship transfers | 249 |
| Ship to Ship transfers using vapour balancing | 249 |
| Ship to Ship transfers using terminal facilities | 249 |
| Ship to Ship electric currents | 250 |
| 12.10 Personnel transfer | 250 |
| 12.11 Liquefied Natural Gas fuelled ship alongside a terminal | 250 |
| 12.12 Lifting equipment | 251 |
| Inspection and maintenance | 251 |
| Training | 251 |
| Chapter 13 Carrying and Storing Hazardous Materials | 253 |
| 13.1 Liquefied gases | 253 |
| 13.2 Ship's stores | 254 |
| General | 254 |
| Paint | 254 |

| | | |
|---|--|------------|
| | Chemicals | 254 |
| | Cleaning liquids | 254 |
| | Spare gear storage | 254 |
| 13.3 | Cargo and bunker samples | 255 |
| | Sample disposal | 255 |
| | Sample storage | 255 |
| 13.4 | Other materials | 255 |
| | Sawdust, oil absorbent granules and pads | 255 |
| | Linseed and other oils | 255 |
| | Garbage | 256 |
| 13.5 | Packaged cargoes | 256 |
| | Petroleum and other flammable liquids | 256 |
| | Dangerous goods | 257 |
| | Entering holds and storage spaces | 258 |
| | Portable electrical equipment | 258 |
| | Smothering type fire-extinguishing systems | 258 |
| | Firefighting precautions | 258 |
| | Forecastle spaces and midship stores | 258 |
| | Deck cargo | 258 |
| | Barges | 258 |
| Chapter 14 | Special Ship Types | 259 |
| 14.1 | Combination carriers | 259 |
| | General guidance | 260 |
| | Slack holds in combination carriers | 260 |
| | Longitudinal stress | 261 |
| | Venting of cargo holds | 261 |
| | Inerting of holds | 261 |
| | Hatch covers | 262 |
| | Tank washing | 262 |
| | Carriage of slops when trading as a dry bulk carrier | 263 |
| | Cargo leakage into ballast tanks | 263 |
| | Testing of cargo tanks and enclosed spaces on dry bulk voyages | 263 |
| | Cargo changeover checklists | 263 |
| PART 3 Marine Terminal Information | | 265 |
| Chapter 15 | Marine Terminal Administration | 267 |
| 15.1 | Marine Terminal Information System | 267 |
| | Marine Terminal Particulars Questionnaire | 268 |
| | Marine Terminal Management and Self Assessment | 269 |
| | Marine Terminal Operator Competence and Training | 270 |
| 15.2 | Documentation | 270 |
| | Terminal operating manual | 270 |
| | Terminal Information Booklet | 272 |
| | Documentation | 272 |

| | | |
|-------------------|---|------------|
| Chapter 16 | Marine Terminal Operations | 273 |
| 16.1 | Limiting conditions for operations | 273 |
| | Risk assessment | 274 |
| 16.2 | Electrical storms | 275 |
| 16.3 | Double banking | 275 |
| 16.4 | Tanker/terminal access | 275 |
| | General | 275 |
| | Provision of tanker/terminal access | 276 |
| | Access equipment | 276 |
| | Alternative means of tanker/terminal access | 277 |
| | Routine maintenance | 277 |
| 16.5 | Over the tide cargo operations | 278 |
| | Discharging over the tide | 278 |
| | Loading over the tide | 278 |
| 16.6 | Operations where the tanker is not always afloat | 278 |
| 16.7 | Generation of pressure surges in pipelines | 279 |
| | Introduction | 279 |
| | Generation of a pressure surge | 279 |
| 16.8 | Reduction of pressure surge hazard | 280 |
| | General precautions | 280 |
| | Operational measures to reduce the risk of a pressure surge | 280 |
| 16.9 | Hot work in hazardous areas in terminals | 281 |
| 16.10 | Pigging | 281 |
| Chapter 17 | Marine Terminal Systems and Equipment | 283 |
| 17.1 | Electrical equipment | 283 |
| 17.2 | Lifting equipment | 284 |
| | Inspection and maintenance | 284 |
| | Training in the use of lifting equipment | 284 |
| | Use of tanker lifting equipment | 284 |
| 17.3 | Lighting | 284 |
| 17.4 | Tanker/terminal electrical isolation | 285 |
| | General | 285 |
| | Tanker to terminal electric currents | 285 |
| | Sea islands | 289 |
| | Tanker/terminal bonding cables | 289 |
| | Insulating flange | 289 |
| 17.5 | Earthing and bonding practice in the terminal | 292 |
| Chapter 18 | Cargo Transfer Equipment | 293 |
| 18.1 | Marine Loading Arms | 293 |
| | Operating envelope | 293 |
| | Forces on manifolds | 294 |
| | Tanker manifold restrictions | 294 |
| | Parking of arms | 294 |

| | | |
|-------------------|---|------------|
| | Ice formation | 294 |
| | Mechanical couplers | 295 |
| | Wind forces | 295 |
| | Precautions when connecting and disconnecting Marine Loading Arms | 295 |
| | Precautions while Marine Loading Arms are connected | 296 |
| | Powered Emergency Release Couplings | 296 |
| | Inspection, testing and maintenance | 296 |
| 18.2 | Cargo hoses | 297 |
| | General | 297 |
| | Types and applications | 297 |
| | Performance | 299 |
| | Marking | 299 |
| | Flow velocities | 300 |
| | Inspection, testing and maintenance requirements for cargo hoses | 300 |
| | Hose flange standards | 304 |
| | Operating conditions | 304 |
| | Extended storage | 305 |
| | Handling, lifting and suspending | 305 |
| | Adjustment during cargo handling operations | 306 |
| | Submarine and floating hose strings | 306 |
| | Hoses used in Ship to Ship transfers | 307 |
| | Electrical isolation | 308 |
| 18.3 | Vapour Emission Control Systems | 308 |
| 18.4 | Cargo transfer drainage and containment | 309 |
| | Marine Loading Arm/hose clearing | 309 |
| | Jetty deck containment | 309 |
| | Hydrocarbon sump tanks | 310 |
| 18.5 | Emergency Shutdown systems | 310 |
| Chapter 19 | Marine Terminal Fire Protection | 311 |
| 19.1 | Marine terminal fire protection | 311 |
| | General | 311 |
| | Fire proofing | 312 |
| | Location and spacing of fire detectors | 312 |
| | Fire-extinguishing system compatibility | 312 |
| 19.2 | Alarm and signalling systems | 313 |
| | Types of alarm systems | 313 |
| | Alarm and signalling systems | 313 |
| | Electric power sources | 314 |
| 19.3 | Detection and alarm systems at terminals | 314 |
| | General | 314 |
| | Control rooms/control buildings | 315 |
| 19.4 | Firefighting equipment | 315 |
| | Terminal firefighting equipment | 316 |
| | Portable and wheeled fire extinguishers and monitors | 316 |
| | Terminal fixed firefighting equipment | 316 |
| 19.5 | Access for firefighting services | 321 |

| | | |
|--|---|------------|
| Chapter 20 | Emergency Preparedness and Evacuation | 323 |
| 20.1 | Overview | 323 |
| 20.2 | Hierarchy of emergency scenarios | 324 |
| | General | 324 |
| | Hierarchy of emergencies | 324 |
| | Local emergency | 324 |
| | Terminal emergency | 324 |
| | Major emergency | 324 |
| | Escalation | 324 |
| | Assessing risks | 325 |
| | Credible emergency scenarios | 325 |
| 20.3 | Terminal emergency planning – plan components and procedures | 325 |
